

Installation Steps

- Install Dependencies from the requirements.txt file
Pip install -r requirements.txt
- After installation create a .env file and add openAi key to it .
- Then run the main.py in an IDE like vs code to get the result
- Chroma db is stored in db folder .
- We will get the output for a question in main.py in the console . We can observe the output by giving different questions.
- It only answers the question if the question is related to the provided dataset. Else it says I can't find answer.
