Question to the Model:

```
question = "Explain TYPES OF ENVIRONMENT:"
```

Answer Given by Model:

```
The types of environment can be divided into three categories: physical/abiotic environment, biotic environment, and cultural environment.

The physical/abiotic environment is further subdivided based on physical characteristics and state. It includes the lithosphere (solid earth), hyd
rosphere (water component), and atmosphere (gaseous component). These environments can be broken down into smaller units such as mountain, plateau
, plain, lake, river, maritime, glacier, and desert environments. The physical environment can also be viewed in terms of climatic conditions, suc
h as tropical, temperate, and polar environments.

The biotic environment consists of flora and fauna, including humans as an important factor. It can be divided into floral environment and faunal
environment.

The cultural environment refers to the social and cultural aspects of the environment, including human activities, beliefs, and values.
```

Answer in the document:

TYPES OF ENVIRONMENT:|-

On the basis of basic structure, the environment may be divided into

- Physical/abiotic environment
